Summary

Looking for the post of an IT Engineer at Multinational Corporation, where I can bring better use of my technical and analytical skills to facilitate structured management of software installation, hardware, printing, email, and issues relating to the operating system, while also enabling personal growth. Also am well qualified in languages like C, C++ as well as Java and have a good knowledge of development tools. Hoping for a position in a company with a challenging environment that will enable me to utilize my skills to the fullest, and by extension, to the company's advantage while also contributing to developing my skills.

Work Experience

Vista Processed Foods – An OSI Group Company

Dec. 2021 – Apr. 2022

Post – Project Intern (Internship)

Responsibility:

- To ensure compliance of GMP and HACCP requirement as per quality management system.
- Responsible for monitoring and product food safety and quality throughout the manufacturing process.
- Checking of all inward materials both physically and laboratory analysis to ensure overall compliance to agreed specification in order to maintain quality of products.
- Responsible for recording and filling of all relevant record logs and documentation.
- Implementation / Practice / Monitor of HACCP, GMP and GHP in Production area.
- Responsible for product sampling and quality analysis.
- Assigned with major projects in QA Lab.
- Responsible to ensure employees are following all food safety and worker safety practices.
- Trained new employees in quality assurance procedures.
- Performed other duties as assigned.
- Proven ability to work independently and as part of a team
